## Superintendent's Message

Progress in education today is inevitable. Any time we desire to study our progress it is interesting to look back, around and ahead. It is interesting to do that now at the Elba City School.

A fair appraisal, I think, would conclude that the years since 1950-1951 have been the richest, most vital and most interesting period in the history of our school. Each year more opportunities and advantages have been made available, and of course 1957-1958 is a milestone in our journey of progress.

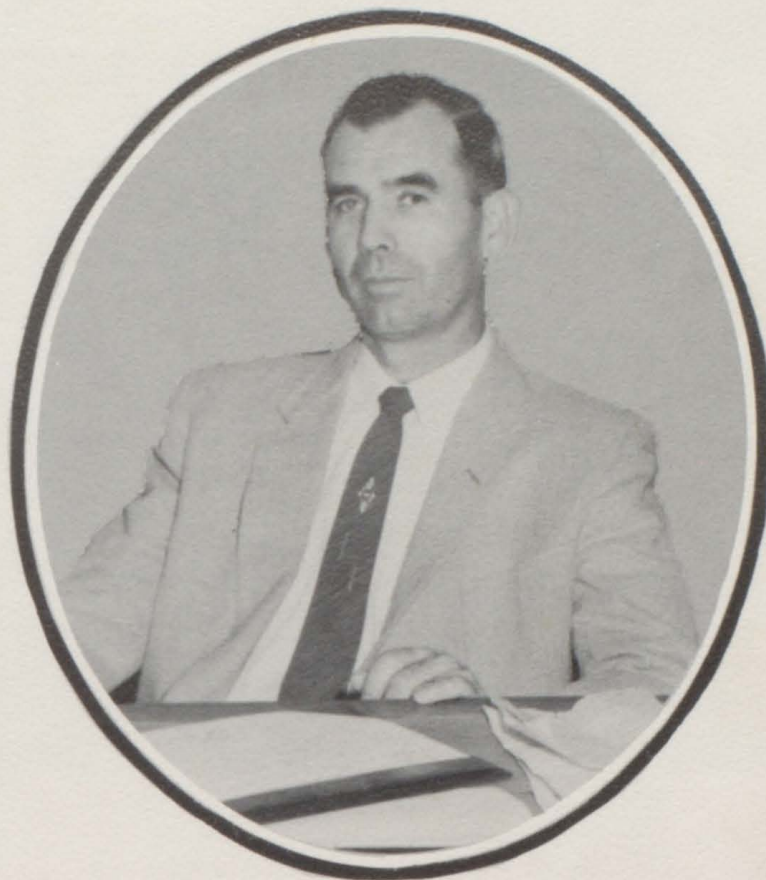

A well-trained faculty, a carefully planned curriculum, mentally and physically alert students, and more space have played their parts in fostering the educational progress in our school.

Students in our school are to be congratulated for being able to share in this moving program of education.

S. J. Casey  
Superintendent
